Profile

Passionate Engineer, willing to work with and as part of a team. Experienced in using VS-Code, Figma, and Agile methodology for team-based projects that are user-friendly, scalable, and drive high-performance web experiences.

Education

Bachelor of Science (Honours) Creative Media and Design L8,

Technological University of the Shannon: Midlands Midwest

September 2020 - Present

- The Bachelor of Science program focuses on equipping us with knowledge and skills related to Interface & User Experience Design, Interaction Design, Visualisation (in both an interactive and non-interactive context), Augmented and Mixed Reality, Web Technologies, and Motion Graphics.
- Student Representative:
  - key liaison between the academic staff and classmates.
  - Organized study sessions for upskilling in HTML5, CSS3, and JavaScript libraries.
  - Negotiated solutions to healthier student lifestyles.

Voluntary

WordPress Development

01 August 2022 – 05 September 2022

- Designed, developed, and launched a community website.
- By implementing the site layout using Elementor, deactivated, and only activated crucial plugins I improved the Site Health Status by 70%.
- By implementing clean and consistent layouts including writing predictable and concise code using the Web Content Accessibility Guidelines (WCAG) I improved Web Accessibility by 98%.
